

HUDDLEBOX

FROM

workagile

workagile

Workagile are experts in designing and making fine furniture that encourages agile working within the workplace. Based on salutogenic design principles (promoting health & wellbeing) our products aim to be agile and multi-functional, encouraging productivity and creativity, whether that be how you specify them or how you use them. We believe furniture should be fun and we will never lose the fun of making it!

So many skills and crafts once thriving in the British Isles, and so many products proudly wearing the 'Made in Britain' badge, have become history with the march of globalisation. We regard it as a privilege to be part of an industry still thriving in Britain and are proud to be keeping alive skills and knowledge developed over centuries. All of our products are designed and manufactured in the Heart of Yorkshire, England, and every item we make has been through the hands of someone that loves what they do – a principle we will always uphold with our products.

Making Work Agile.

HUDDLEBOX

Huddlebox encourages collaborative working and will see teams engaging like never before due to the relaxed and informal configurations available. These stackable boxes come in a range of designs, including new planter options and colours inspired by our devotion to Salutogenesis.

WORKAGILE.CO.UK

MATERIAL LAB

Huddlebox gives the designer the tools and options to capture the style and culture of any organisation.

Whether you wish for an eclectic collection of colours and materials or a monochrome feel, Huddlebox can deliver on point.

We encourage designers and clients alike to visit the Huddlebox Material Lab in our showroom where you can play with the miniature Huddlebox models and finishes.

You'll be amazed at the never ending options that creative minds can generate. Now with the new biophilic planter options you can even create your own tropical oasis!

Capture Your Style.

Huddlebox is available in a range of inspiring finishes and colours including three standard Valchromat colours, two wood ply veneers and 18 hard wearing colours surfaces from Forbo Flooring Systems.

FINISHES

COMFORT

Huddlebox is so versatile we think you'll spend hours sat on it! If comfort is important to you, why not consider Huddlebox's complimentary seat pads, each covered in a choice of premium Camira Fabrics.

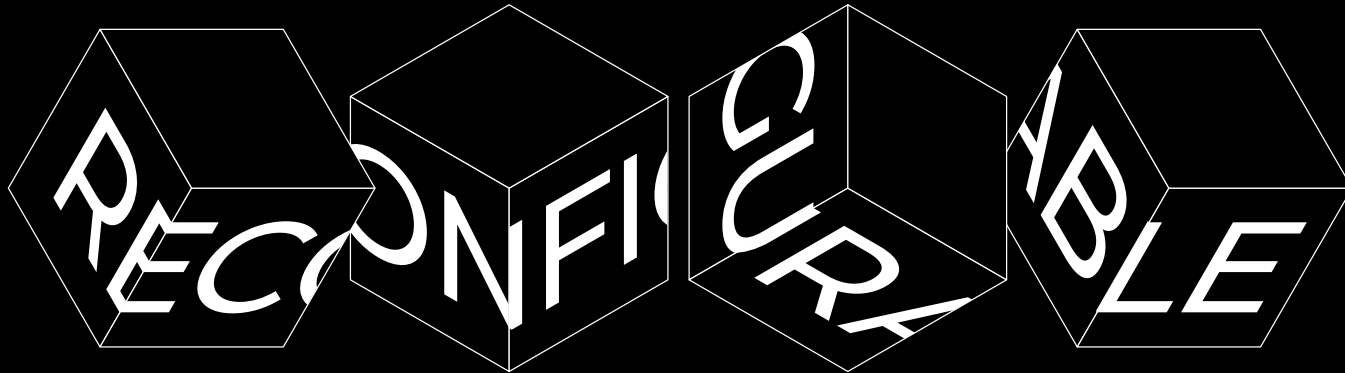

Biophilic elements are being implemented into office space designs more so than ever, bringing with them a whole host of benefits in health, wellbeing and productivity.

BIOPHILIA

Huddlebox is also available in a range of biophilic modules, allowing you to bring nature into your meeting and presentation spaces as much as your home or office.

MODULAR vs BLEACHER

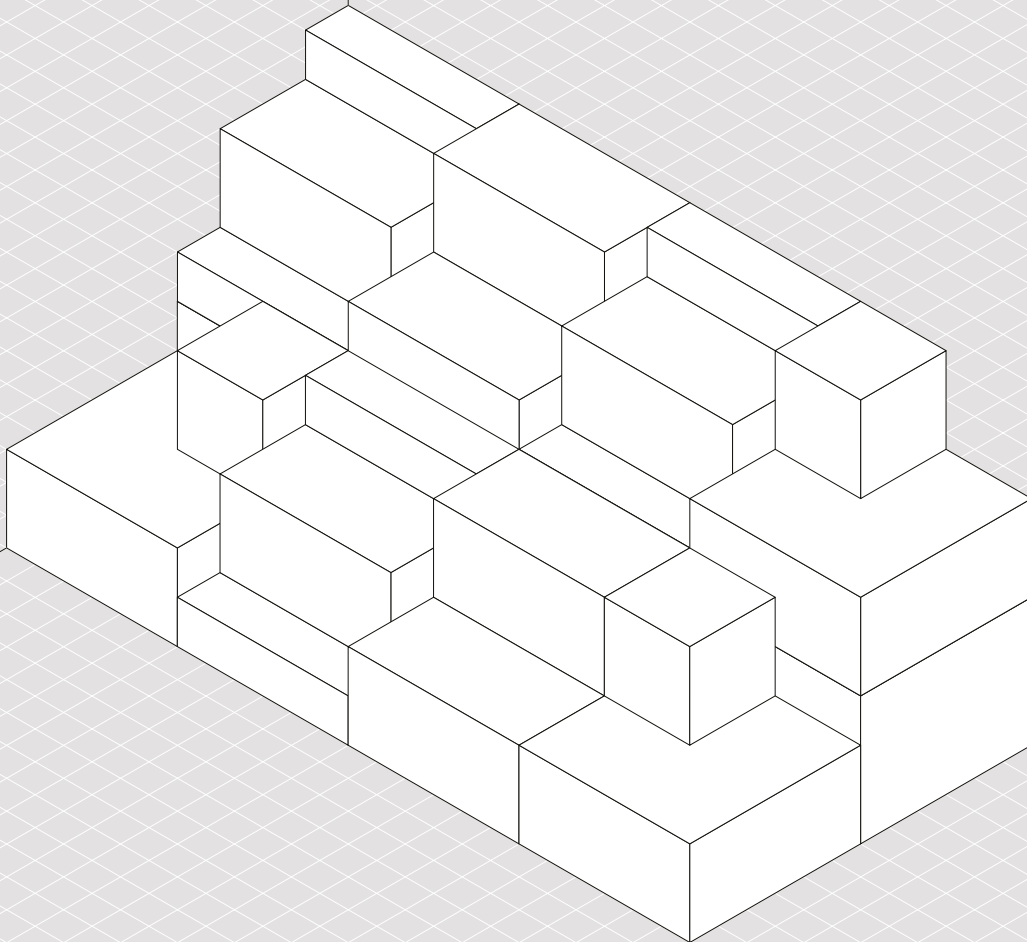

In the last few years fixed 'bleacher' style seating spaces have been designed into many workplace designs. Huddlebox addresses the inflexibility that a permanent fixture creates. Work patterns change, staff numbers change and so should the workspace to accommodate these changes. Truly agile workplace furniture should be agile in its own right!

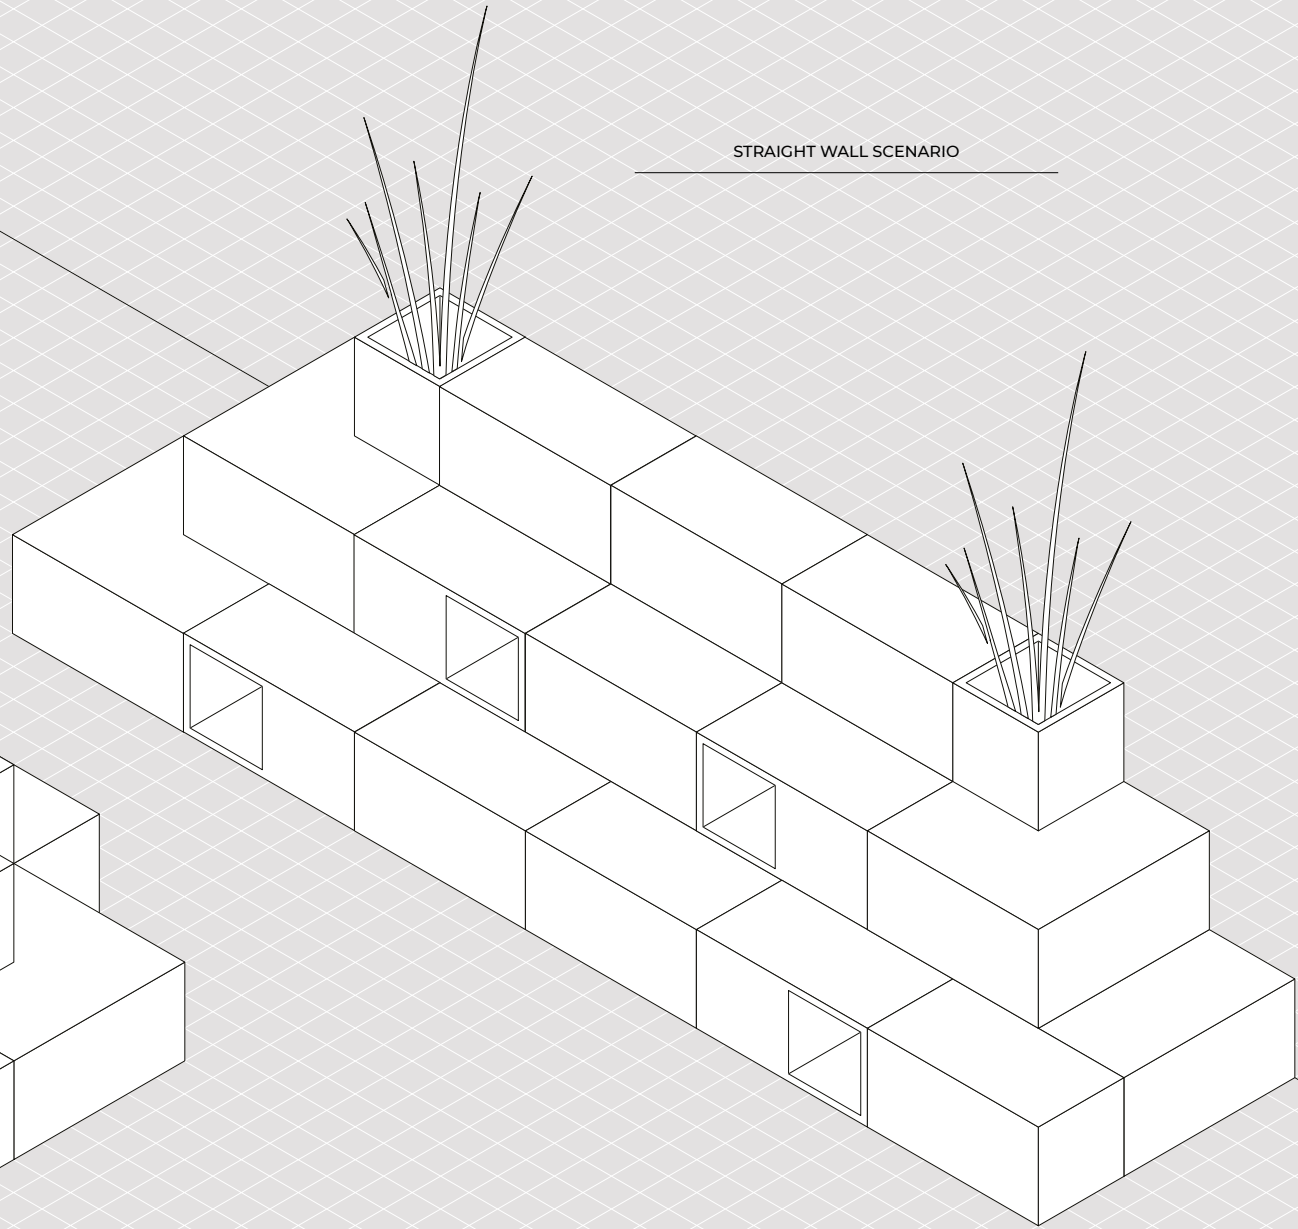

TYPICAL HUDDLEBOX CONFIGURATIONS

Huddlebox's infinite flexibility means there's a solution for any space, no matter how big or small, long and thin or wide and short your space may be.

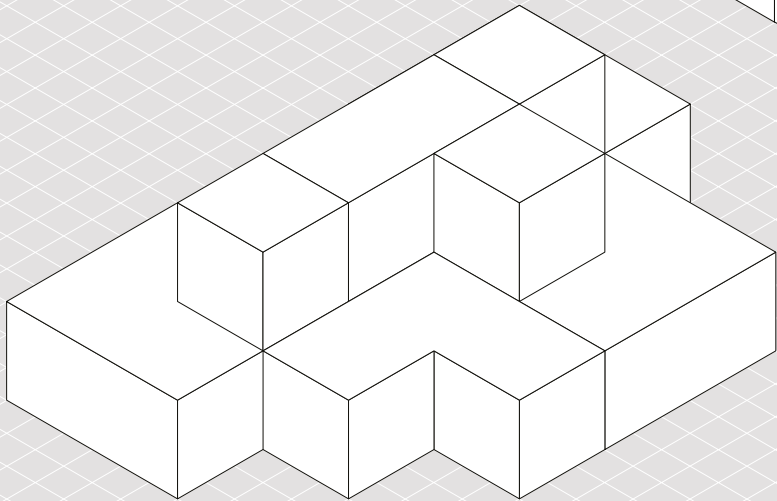

Here are some typical configurations to get your imagination flowing. Don't be limited though, why not use the isometric notepad at the back of this book to sketch out your own Huddlebox!

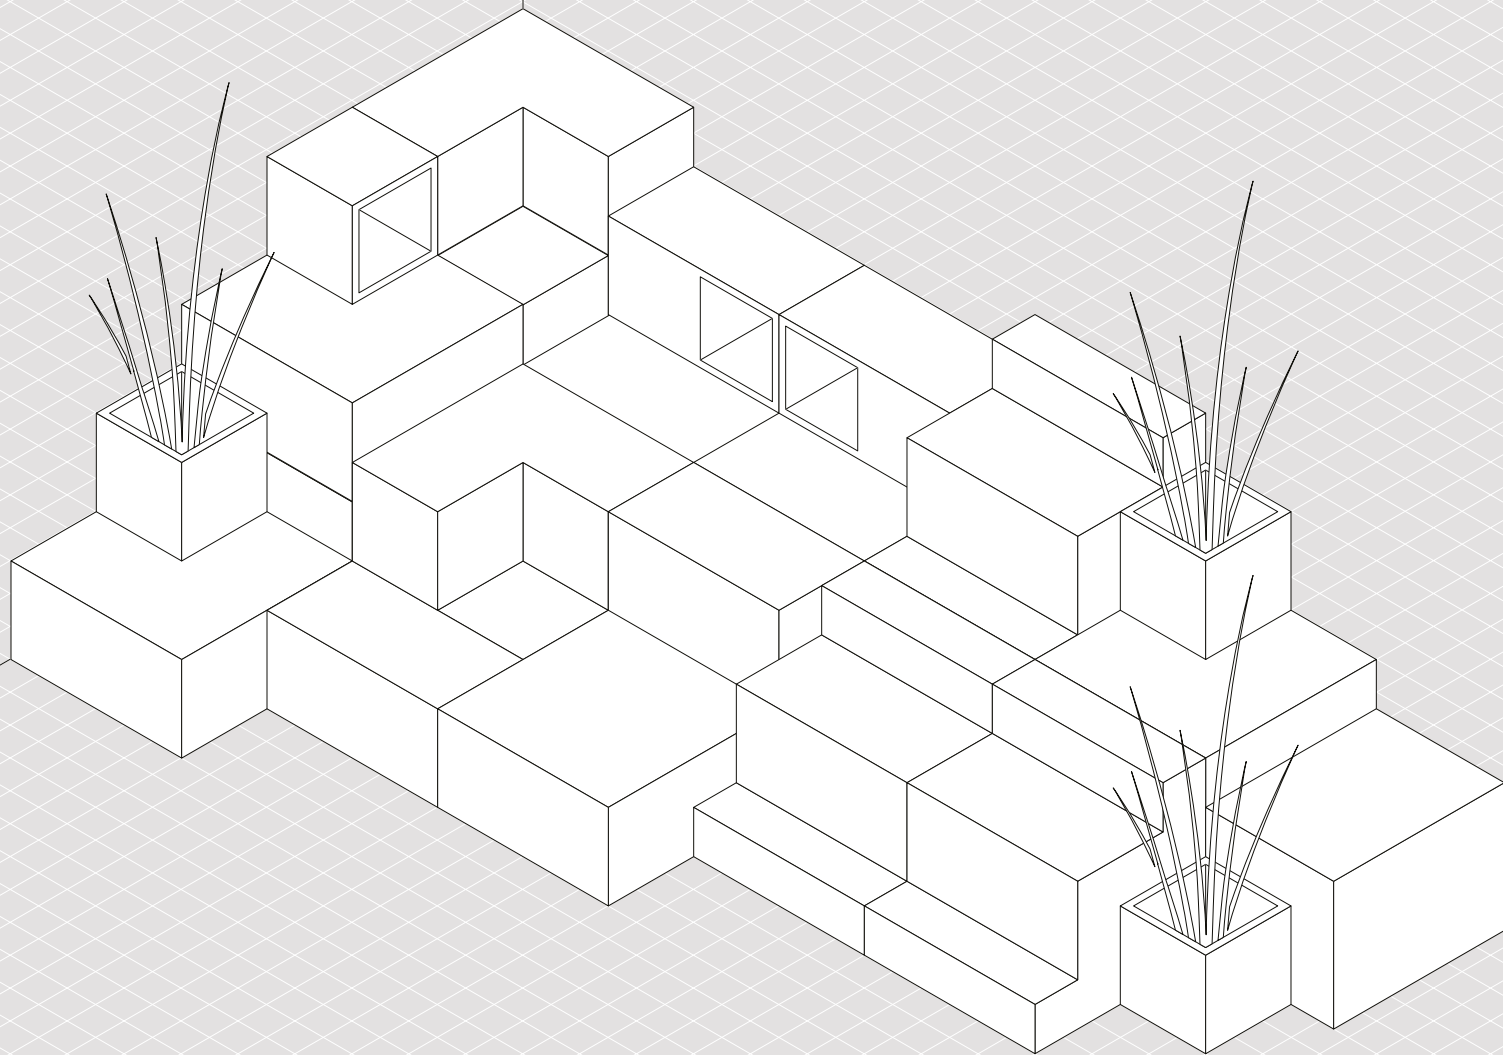

STRAIGHT WALL SCENARIO

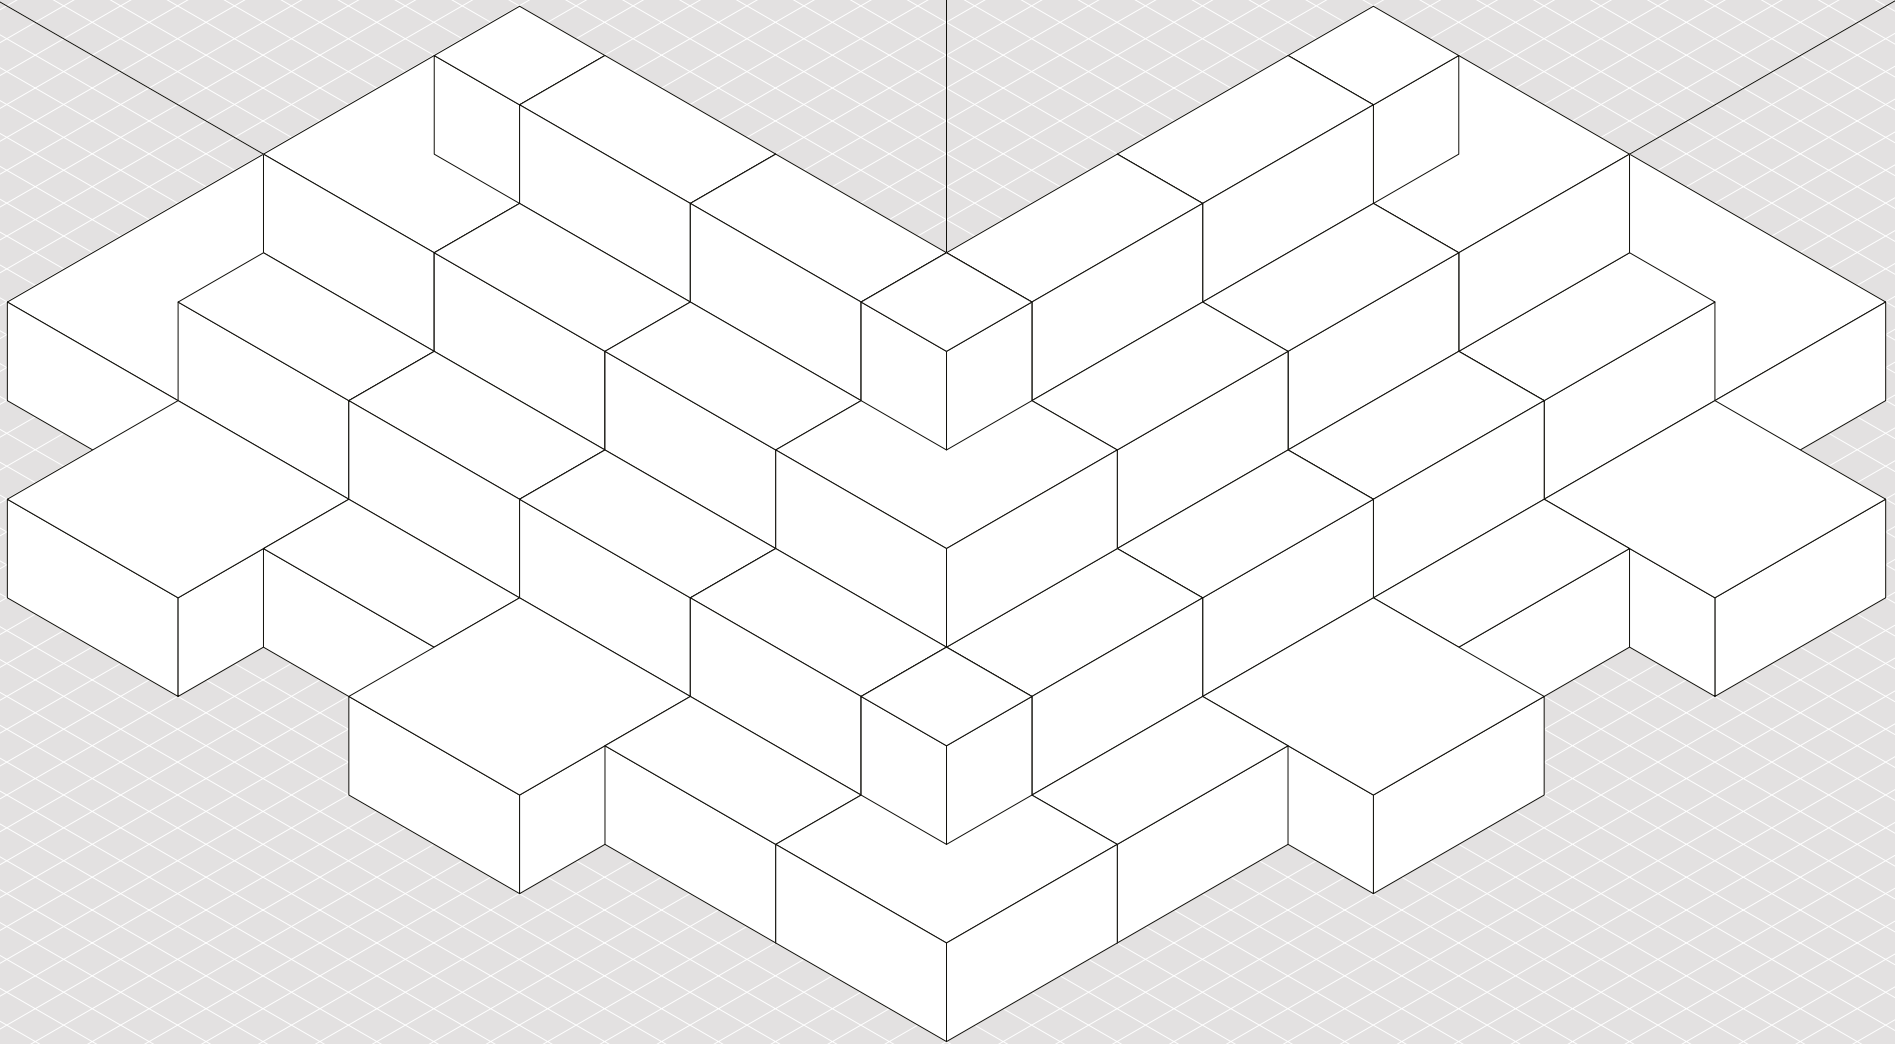

ISLAND SCENARIO

CORNER SCENARIO

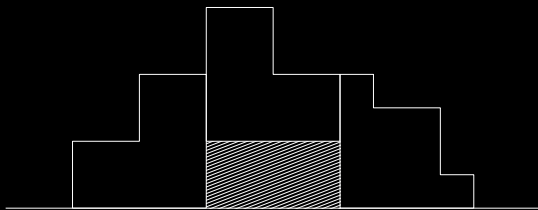

EXTERNAL CORNER SCENARIO

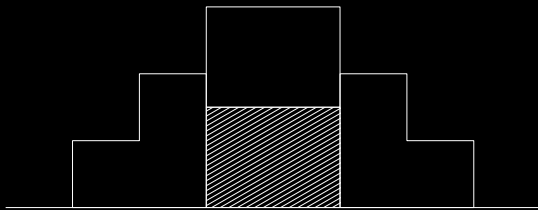

Three riser heights for greater flexibility in design.

Depending on the depth and height available Huddlebox can adapt to suit, utilising all dimensions to maximum effect.

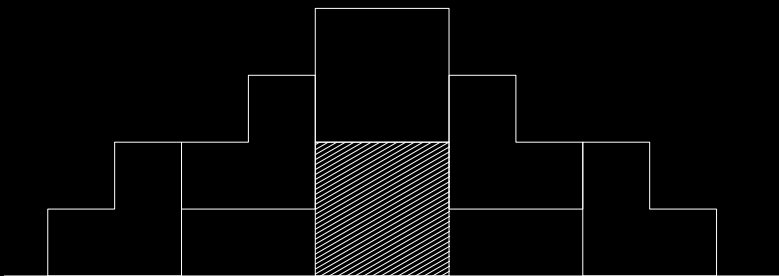

ISLAND SCENARIO

1/2 HEIGHT

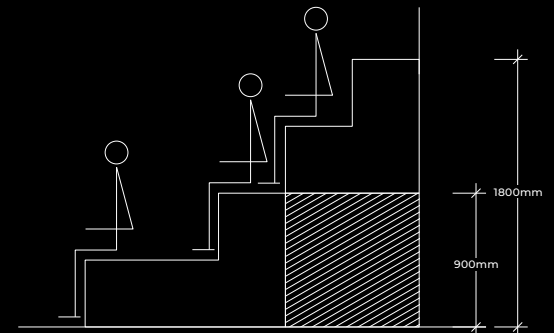

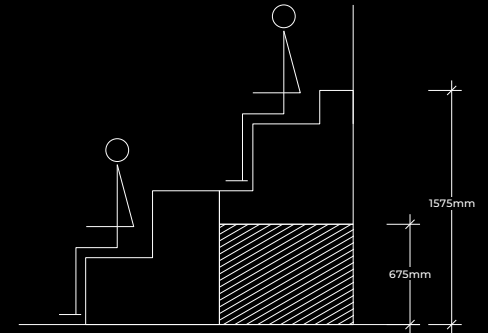

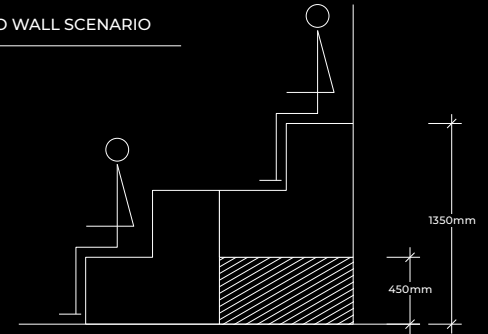

3/4 HEIGHT
